

Q1. Match Statistics

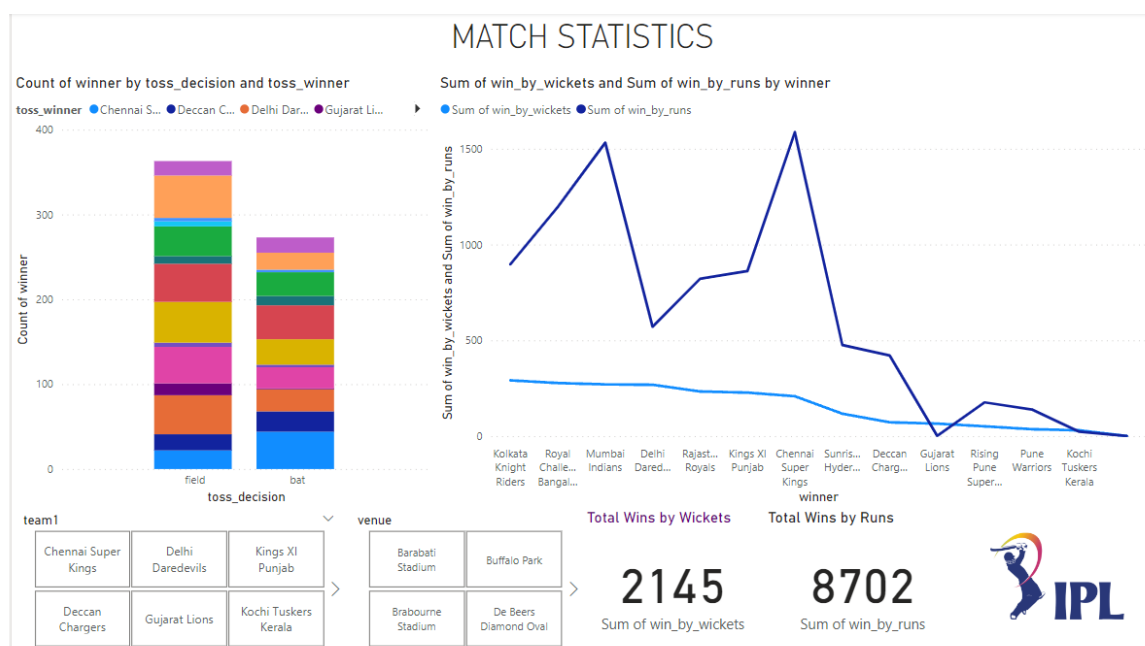

- Toss outcome vs Match outcome (for each Ground/Venue)
- Biggest wins (by runs and by wicket)

To control the above graphs the following slicers were added.

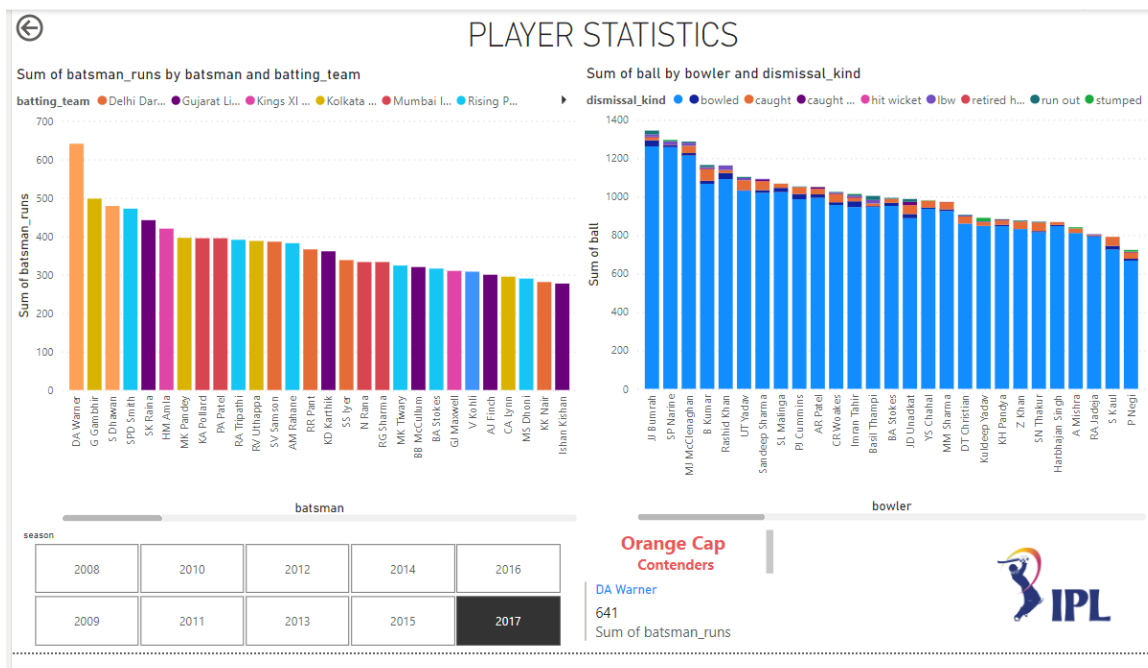

Final Board

2. Player Statistics:

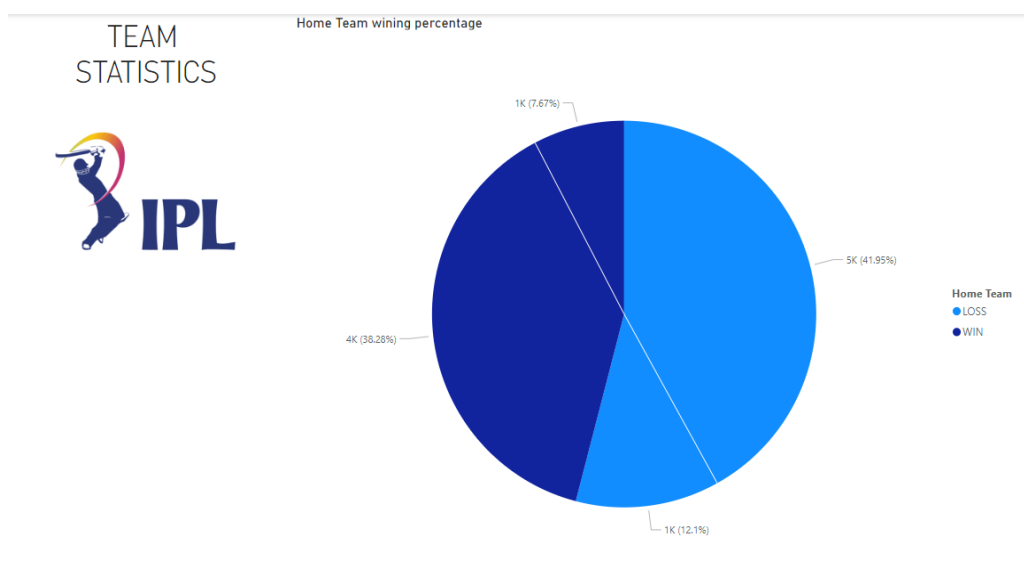

- Orange Cap contenders (The batsmen who have scored the maximum number of runs in a particular season)
- Purple Cap contenders (The bowlers who have taken the maximum number of wickets in a particular season)

Slicer was added to select seasons, thus batsmen and bowlers with highest runs and wickets could be filtered easily.

3. Team Statistics

- Win %age (home vs away)

Steps for Team Statistics Graph

Step 1 : Added a new conditional column which checked the value for column 'team1' and 'team2' with the home teams name. Thus giving us the actual name of the team and not team1 and team2.

Step 2 : After this one more column was added which checked if the home team name and winning team was the same. If it was same then the value added would be 'WIN' or '1' else the value would be 'LOSS' or '0'
